Attention rules (review cues)

Rule cues support triage and do not assert wrongdoing.

US federal agencies (comma-separated)

NSF, DOE, DARPA, NIH, ONR, AFRL, ARPA-E

☒ M2: require same affiliation for email mismatch

SENTRY: Research Security Anomaly Detection Toolkit

Triage states (NORMAL / ATTENTION / FLAGGED) are driven by anomaly scores and rule-based signals; reports provide evidence-grounded summaries for human review.
